

# **4 Up Apartments Concrete Pour**

## **Company Collaboration:**

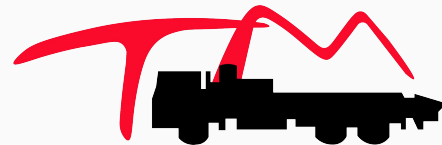

- **Primary Contractor:** TIPP-MONT Concrete Pumping
- **Partner:** WINCO Construction Company

# Project Details:

- **Equipment Used:**
  - 20 m pump
  - 28 m pump
  - 40 m pump
  - 47 m pump
  - Telebelt
  - Laser Screed
- **Timeline:** 2023-2024
- **Location:** Purdue Campus, West Lafayette

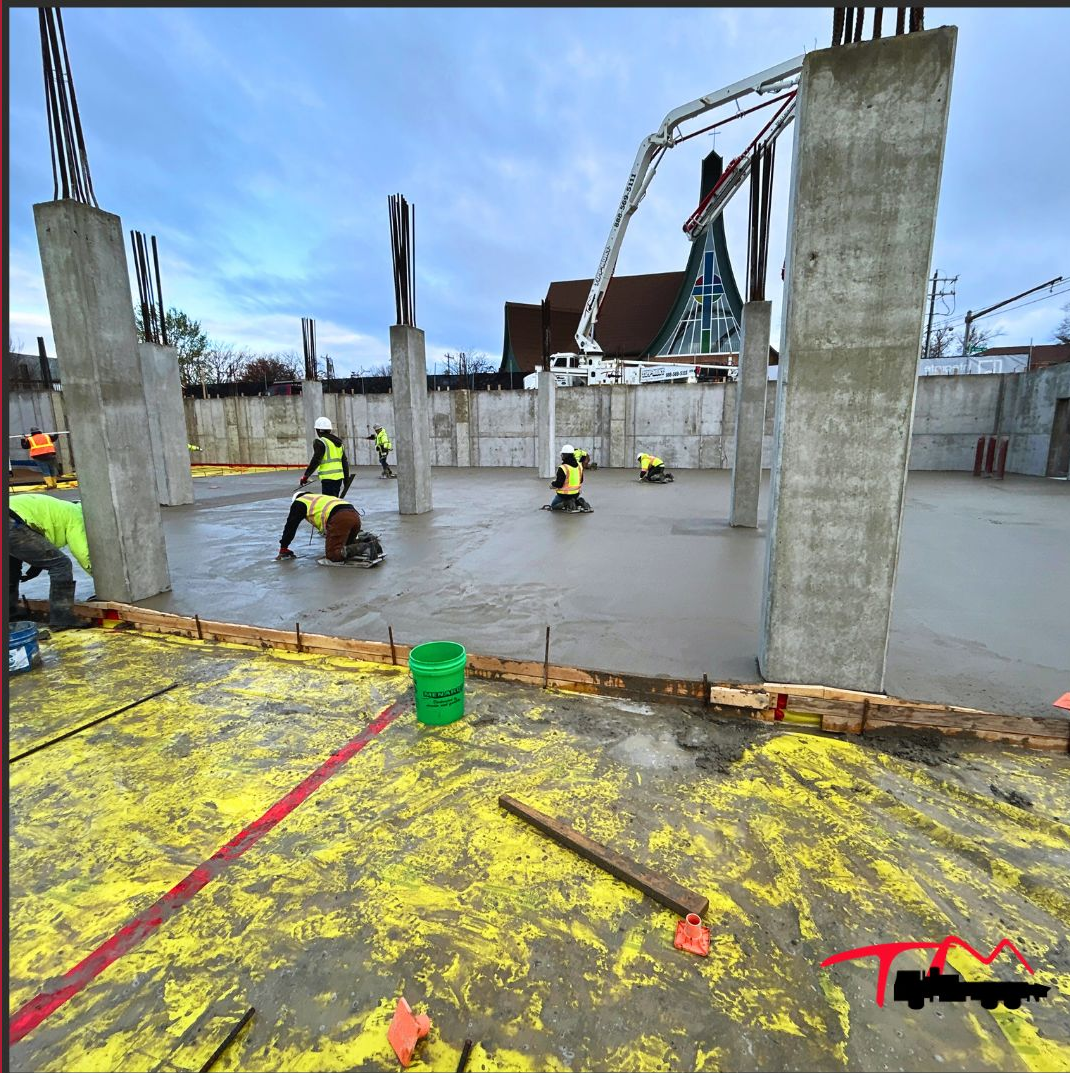

# Scope of Work:

- **Area:**
  - 6,011.50 yards of poured concrete
  - 550 tons of gravel
  - 26,530 sq ft screed
- **Description:**
  - The building included an underground parking garage with a total of 107 parking spaces. 3 floors of living area, all which were upwards of 31,000 square feet as well as a courtyard on the first floor that had over 18 drains within the concrete.

# Challenges and Solutions:

- **Challenge:**
  - The main challenge for this project was the intense 6-month tight schedule. Additionally, 2:00 AM elevated post-tension slab pours and required minimal laydown area on site.
- **Solution:**
  - We expertly managed our employee schedules, pour times, and resources. Navigating pumps on site required precision and handling to avoid site materials. TIPP-MONT operators ensured smooth pours on site.

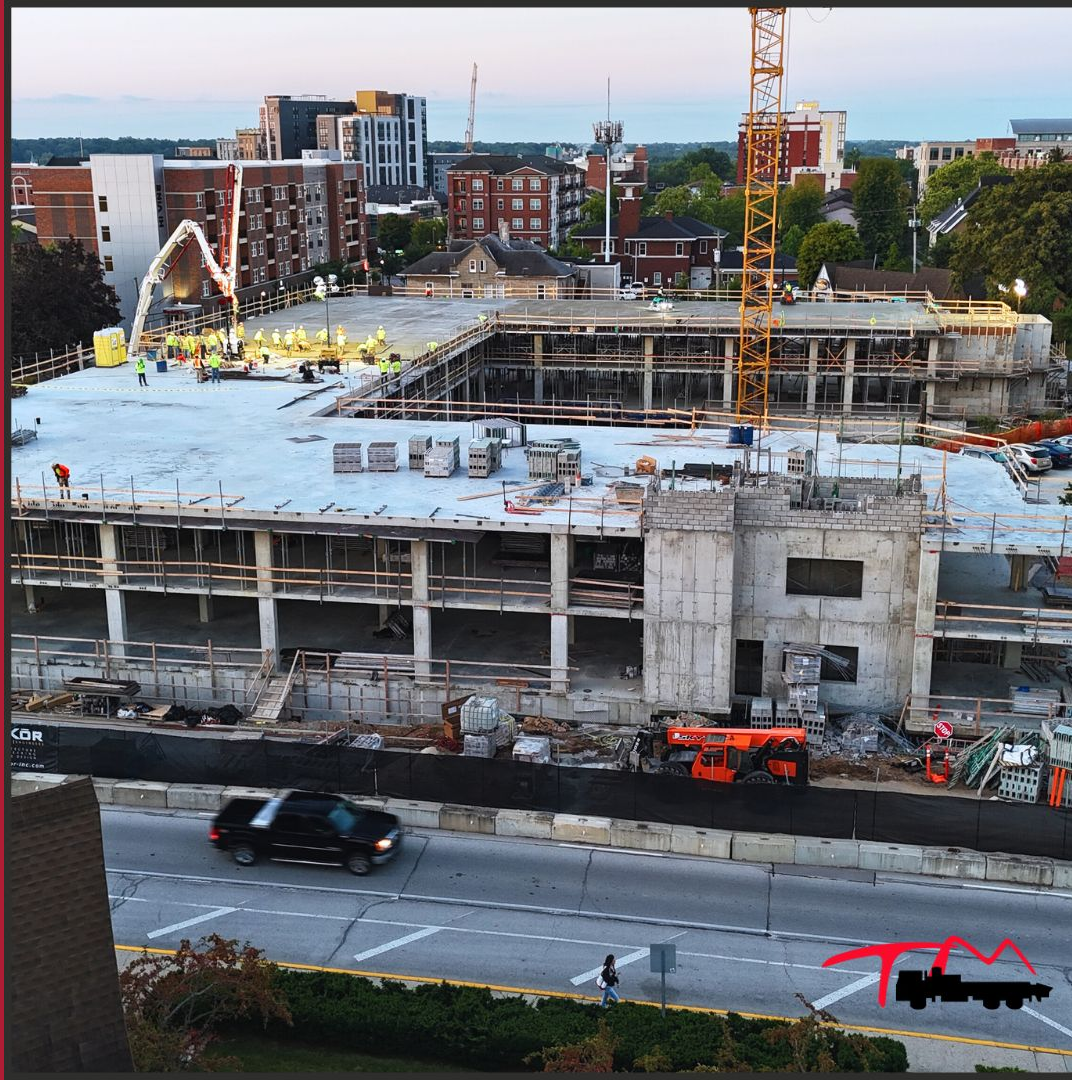

# Outcome:

- **Status:**
  - Completed
- **Result:**
  - In conclusion, this construction project stands as a testament to hard work, collaboration, and attention to detail. Thanks to the dedication of everyone involved, we've successfully delivered a high-quality result that meets and exceeds expectations. This achievement reflects the team's commitment to excellence, and we can take pride in the quality of our work.
